# MUHAR FERDIANSYAH

Ciledug, Tangerang, Banten ● 085779659563 ● ferdiansyahmuh5@gmail.com ● LinkedIn ● GitHub ● Portfolio

## Education

**UNIVERSITAS PAMULANG** Tangerang Selatan, Indonesia

Bachelor of Science in Informatics Engineering 2023 – Expected 2027

**Relevant Coursework:** Software Engineering, Database Systems, Web & Mobile Application Development, Algorithms & Data Structures, Relational Database Modeling.

## Technical Skills & Projects

**Programming:** PHP, JavaScript, TypeScript, Dart, Java, SQL (PostgreSQL, MySQL), Python.

**Frameworks & Libraries:** Laravel, Node.js, Express.js, NestJS, Next.js, React.js, Inertia.js, Tailwind CSS, Bootstrap, Flutter.

**Databases & Tools:** PostgreSQL, MySQL, MongoDB, Prisma ORM, Redis, Git, GitHub, Docker, Postman, RESTful APIs, JWT.

**ERP Purchasing & Inventory System: Enterprise Web Platform** github.com/muhar05

- Architected an end-to-end ERP platform managing multi-tier procurement, supplier catalogs, automated stock deductions, and hierarchical approval workflows.
- Designed normalized PostgreSQL database schemas with Prisma ORM across 10+ relational models, ensuring referential integrity and optimized query performance.
- Implemented secure RESTful APIs with JWT authentication and granular Role-Based Access Control (RBAC) to support multi-department operations.
- Built high-performance responsive dashboards using Next.js and TypeScript, streamlining procurement lead times.

**School Management & Online Registration Portal: Academic Administration System** github.com/muhar05

- Developed an integrated school portal handling online student admissions (PPDB), tuition fee payments, and academic record management.
- Implemented a Progressive Web App (PWA) with Laravel and Inertia.js, combining SPA fluidity with offline-ready and installable mobile capabilities.
- Integrated a headless WordPress CMS to allow non-technical administrative staff to publish school updates and official announcements.

**Backend File Processing API: Distributed Task Queue Service** github.com/muhar05

- Architected an asynchronous background file processing REST API using NestJS, Node.js, and PostgreSQL.
- Implemented distributed background queues using BullMQ and Redis for robust file ingestion, automatic task retries, and real-time job status tracking.
- Designed modular RESTful endpoints supporting pagination, status filtering, JWT authentication, and automated error handling.

## Relevant Experience

**KJPP RUKY SAFRUDIN DAN REKAN** Tangerang Selatan, Indonesia

**Administration Staff** June 2025 – Present

- Managed and validated property valuation records and asset documentation, maintaining 99%+ accuracy across client appraisal reporting pipelines.
- Standardized digital documentation workflows and coordinated reporting datasets between appraisers to accelerate daily operational turnaround time.
- Automated verification routines for valuation datasets, reducing manual data entry inconsistencies and reporting backlog.

## Leadership

**ECOBANK026 COMMUNITY INITIATIVE** Tangerang, Indonesia

**Lead Fullstack Developer & Community Coordinator** January 2024 – Present

- Engineered and deployed a web-based community financial and waste bank management platform for RT/RW neighborhoods serving 100+ households.
- Built modules for automated citizen billing, community cash management, recyclable waste valuation, and exportable financial reports (PDF/Excel).
- Coordinated digital adoption and led walkthrough sessions for neighborhood board members, transitioning manual paper ledgers to digital tracking.
